Abrasive Wheels Course

Introduction

The course aims are to introduce candidates to the hazards involved with the use of, and the mounting of abrasive wheels on a spindle, and the controls measures available. It also covers the requirements of the Provision and Use of Work Equipment Regulations 1998 and other related legislation.

Aims

By the end of the course all delegates will:

- Be aware of current legislation associated with the use of abrasive wheels
- Understand the hazards and precautions including personal protective equipment
- Be able to position work guards and rests
- Understand various compositions and markings
- Be able to maintain abrasive wheels
- Be able to inspect, test, mount balance, dress and set true abrasive wheels
- Be able to check speed requirements
- Understand grinding operations
- Be aware of hand arm vibration

Who should attend?

This course is designed for all personnel whose company intends to appoint to carry out duties of mounting or to supervise the mounting of abrasive wheels

Course content

Health and Safety at Work Act 1974
