CDM Designers Duties

Introduction:

This 1 day course combines tutorials with interactive exercises that have been developed to provide all parties involved in the construction process with an understanding of the Construction, Design and Management (CDM) Regulations, together with a full appreciation of the problems and practicalities of its application. The roles and responsibilities of the Designer under CDM are given extensive coverage, together with the suggested contents of Health and Safety Plans and Files.

Aims:

By the end of the course delegates will be able to:

- Have an improved awareness of their company's criminal and civil liabilities
- Be aware of the company's liabilities regarding other duty holders
- Identify other legislation relating to the construction process
- Possess an improved knowledge of the legal requirements within the CDM Regulations
- Identify safe construction and future maintenance methods during design stage.
- Have a better understanding of the problems faced by the various parties involved in the CDM process
- Have an appreciation of the roles and responsibilities of Client, Contractors, Sub-Contractors concerning risk assessments and safe systems of work
- Be aware of the requirements regarding Health and Safety plans and files
- Have a good understanding of methods for identifying improvements in future maintenance of projects

Course content:

- Introduction to Health and Safety, Law and Practices
- Accident Causation, Prevention and Reporting
 - Monitoring and Reviewing Requirements
- Background to the CDM Regulations, Where CDM Applies and Does Not Apply, Roles and Responsibilities Under CDM
 - The Designer,
- The Contents and Development of the Health and Safety Plans and File
