Working Safely with LPG

Introduction:

A one-day course for anyone, in your organisation, that may be required to work with Liquefied Petroleum Gas LPG. The course gives general guidance to delegates on the hazards and safe working procedures. To provide the student with the skills required to tackle small fires or LPG leakage safely and efficiently and have the ability to operate as part of an emergency response team prior to the arrival of the emergency services.

Aims:

By the end of the course delegates will be able to:

- State the properties of LPG and safety procedures for its use.
- Understand the safe approach method adopted during firefighting operations.
- Demonstrate the correct firefighting method adopted for tank fires, bund spills and relief valve fire incidents.
- Understand the correct casualty handling skills needed for safe and effective rescue measures.

Course content:

- Legislation and Codes of Practice
- LPG Properties
- Safe working procedures
- Safe approach methods
- Tank fires, bund spills and relief valve incidents
- Casualty handling
- Effective rescue procedures

Who should attend

All personnel who may be required to work with LPG.
